# User Stories + Personas

Personas

Introducing…

➤ **"El Studente" (Eportfolio user)**
A Masters student studying Information Technology. Working with a group of students to create a group project. Is talented and enjoys personal coding projects, as well as walking his dog, "Small El". Really wants to get hired upon graduation, and would love to have a place to show off all his coding skills and experience.
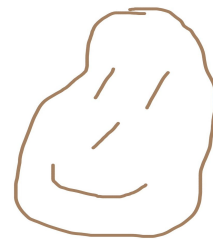

➤ **"Joseph the 2nd" (Potential Employer)**
Joseph the 2nd has just started his 10th year as the Manager of Talent Acquisition at Big Bucks Bank. Recently, the entire IT department of BBB have left all at once to pursue their dream of becoming a professional dance troupe, so Joseph is eager to find, hm, let's say...more reliable replacements. When he looks to hire people, he wants them to be the very best, like no one ever was. To find them is his real test, to hire them is his cause.
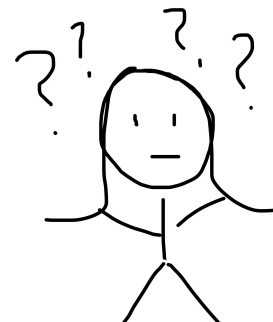

➤ **"Potato #3" (developer)**
This is a spud studying computer science. This spud loves to work in harmony with other spuds to create a portfolio website. The potato's primary concerns are learning new skills, being proud of what they have made, and making sure El Studente is also happy with what they have made.

➤ **"Roberta" (the general viewer)**
Roberta has no idea where she is, or why she's here. Roberta does not have a vested interest in El Studente, his future, or his skillset, but Roberta may be curious enough to look through the site. If she thinks the site is pretty, or cool, she may remember and bring it up in conversations in the future, which MAY help El get hired.

User Stories

El Studente's stories: *"As a client who uses the eportfolio, I would like my information displayed in a clear and cohesive way that best highlights my skills and capabilities."*

User Story	Acceptance Criteria		
	Given	**When**	**Then**
